

1. Grade your own homework.
2. Scan written documents and upload to the Moodle homework drop box. (Please be mindful of file size as photographs can have large file sizes.)
3. Upload formatted Jupyter notebooks in `.ipynb` format to the Moodle homework drop box.
4. All documents should have the heading: **Homework N First_Name Last_Name** where **N** is the homework assignment number.
5. All uploaded files should follow the naming convention **H_N_username_*** where **N** is the homework assignment number, and ***** is any descriptor that you care to create. (Please keep the descriptor ***** short.)
6. Write your total homework score in the comment box of the Moodle homework drop box, e.g. **42/48** where **42** is your homework score and **48** is the maximum possible score.
7. Graded homework assignments are due by midnight.
8. If you make a mistake or are unable to complete a portion of the homework by class time, you can recover **half** of the points you lost by using the homework key to correct your mistakes or complete the homework. **You must understand the correction. Don't simply copy the homework key.**
