

A Descriptive Project Title

Jane Doe, John Doe, Joe Smith
(Authors listed in alphabetical order by last name.)

May 3, 2018

Abstract

A very brief description of your project, your goals and your main results.

1 Introduction or Background

2 (One or more descriptive sections.)

3 Results

4 Conclusion

References

Guidelines

- Report should be 3–5 pages total.
- Report should be brief and not have fluff.
- Don't say the same thing multiple times.
- Report should have enough detail that someone else can check your conclusions.
- Are you more interested in interpretability or prediction accuracy or both?
- What is your baseline machine learning method.
- Describe your data set, how you obtained it and any preprocessing completed.
- Describe any feature selection or feature engineering used.
- Did you optimize any hyper-parameters. How?
